1938 SPRING PRICE LIST ON GLADIOLUS

ROUTE #1
BOTHELL, WASH.

WARREN H. DOWLING

EVERETT EXCHANGE
PHONE -SOUTH 2162

All bulbs are guaranteed to be true to name and free from any harmful disease. Bulbs proving otherwise we will cheerfully replace or return your money. In other words, you must be satisfied.

MAIL ORDERS

Orders from this list will be mailed anywhere in the United States postage paid. However, we do not solicit orders for less than \$2.00 to be delivered postage paid.

SUBSTITUTIONS

We make no substitutions of one variety for another unless we are asked to do so by the buyer. However, we will use the next size smaller of the same variety if out of size ordered unless advised not to. It is advisable to make a second choice on late orders.

5 bulbs of a variety and size may be had at the 10 rate.

GLADIOLUS THRIPI

Just a word on this pest which has inhabited many gardens these past few years. Thrip are not hard to control. Treat your bulbs prior to planting for at least eight hours. (Don't peel the husks off the bulbs as the husks retain the solution and carry it into the ground. A good way to do is to put the bulbs to soak in the evening before you plant, allowing the bulbs to soak over night. If they should be in the solution a little longer than the eight hours it will not harm them.

Use either a glass or wooden container for soaking as the preferable solution, Bichloride of Mercury, made up in the 1-1000 solution will eat up any metal container. (Plant while bulbs are still wet). Any solution which you may get on your hands will not harm.

Formula for large lots is 1 oz. Bichloride of Mercury to seven and one half ($7\frac{1}{2}$) gallons of water.

For smaller lots one may purchase small bottles of tablets at the drug store with instructions as to amount to use for 1-1000 solution. Use a new solution for each soaking for best results.

Spraying the plants after they have attained a height of 8 or 10 inches should be practiced by all growers. Even though you are free from Thrip at planting time there is nothing to stop them from flying into your gardens from your good neighbors who made no effort at planting time to control this pest. (Plants should be sprayed once every week until spikes start to appear). If this policy is carried out one is pretty safe as you will, no doubt, get the first that

might appear, and that will control the propagation to any damaging extent.

Formula for Spray is:

3 gal. water
1 rounded tablespoon Paris Green
2 lbs. brown sugar

Visitors to our gardens while gladiolus were in bloom may have made note of certain varieties which are not listed in this price list. This is on account of stock not being sufficient in quantity to list. Ask about them when ordering and we can, no doubt, supply them at listed prices of other reliable growers.

SIZES

Large: $1\frac{1}{4}$ inches or more in diameter. Medium: $\frac{3}{4}$ inch to $1\frac{1}{4}$ inch.
Small: $\frac{3}{8}$ inch to $\frac{3}{4}$ inch.

We specialize in cut flowers during the blooming season in large quantities for weddings, church decorations, etc.

Should you care to visit our plantings during the summer we most cordially invite you.

Our location is 3/4 mile South of Murphy's Corner on the Old Seattle Everett Highway. Watch for the sign on the right hand side of the road going South.

We trust you have a most successful and enjoyable season in the growing of gladiolus for 1933.

Let me call your attention to this one, OLIVE OLSON - a good early strong growing light pink - not more than 100 to any one customer. Priced per 100 #1 \$5.00; #2 \$4.00; #3 \$3.00; #5 \$1.75; #6 \$1.00. No bulblets for sale this year. Cut flower growers should have this.
